

## The Cogent Advantage

Cogent's Optical Wavelengths provide high-bandwidth, low latency, long-haul data transport between data centers to support business-critical applications, business continuity and disaster recovery. Optical Wavelengths reliably carry large volumes of data over Sprint's® geographically diverse, unique, nationwide footprint, with near 100% network availability. Our Optical Wavelengths also deliver additional flexibility and scalability to your network, while providing infrastructure diversity and redundancy.

### Key Features

- Diverse coast-to-coast routing options
- Multiple unique East-West and North-South routes
- Secure, low latency, high availability connections
- Full signal transparency
- Over 30,000 fiber miles on Sprint's® network footprint

### Speeds & Interfaces

- 10G: OTU2 / 10GE WAN PHY, OTU2e / 10GE LAN PHY
- 100G: OTU4 / 100GE
- Other interfaces available upon request

### Delivery

- In most leading Carrier Neutral Data Centers in the US
- Installation Guarantee

## Secure Reliable Data Transport

Thousands of customers rely on Cogent to carry VoIP traffic, sensitive financial data, shared applications, trading information, video files, and replicated data for high availability or disaster recovery. Cogent Optical Wavelengths are the ideal solution to transport your data between data centers, connect to the Cloud, and deliver the network flexibility, redundancy, and additional diversity you need.

## About Cogent

Cogent Communications Holdings, Inc. (NASDAQ: CCOI) is a multinational, Tier 1 facilities-based ISP, consistently ranked as one of the top five networks in the world. Cogent specializes in providing businesses with high speed Internet access, Ethernet transport and colocation services. Cogent built one of the largest and highest capacity IP networks in existence. This network enables Cogent to offer large bandwidth connections at highly competitive prices.
